

Ergo 201 : Fix it!

Wednesday October 29, 2008
8:30 a.m. - 5:00 p.m.
Ayr (Cambridge), ON

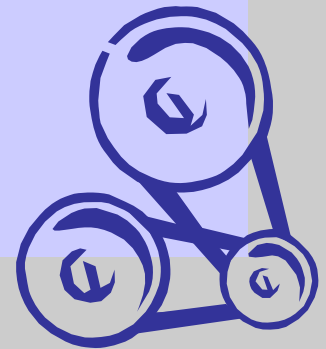

A follow up to Ergo 101, this course focuses on implementing quick-fix solutions to issues previously identified with the Hazard Identification Tools in Ergo 101. (If you didn't attend Ergo 101, don't worry, we'll just assume that someone has told you that a job needs to be fixed!)

You will learn to:

- Identify and invite key stakeholders to your brainstorming session
- Effectively conduct a brainstorming session, developing creative and practical solutions
- Use simple machines (levers, pulleys, wheels, etc) to solve ergo issues (We'll inspire you with case studies!)
- Apply ergo design guidelines for working heights, reaches and clearance
- Conduct a mock up of your solution
- Summarise your recommendations effectively
- Assist with implementation using coaching, posters, and other good communication methods

Your course fees include:

- Detailed course manual, quick reference guide, tape measure, lunch and refreshments

To register: Fax this to 519 632-7469, or mail it with your cheque to

Taylor'd Ergonomics at P.O. Box 1107, Ayr, ON N0B 1E0
